- Marrakech, Morocco

Skills

Programming
Java, Python, TypeScript

Web Development
HTML, CSS, JavaScript

Frameworks
Spring Boot, Spring MVC, FastAPI, Angular, Next.js

Databases
PostgreSQL, MySQL

AI
RAG, LangChain, Deep Learning, NumPy, Pandas, Scikit-learn

Architecture
MVC, Microservices

DevOps
Docker, Kubernetes, Git, GitHub Actions, CI/CD, JIRA

Soft Skills
Teamwork, Communication, Problem Solving

Languages

- French
- English

Education

Software Engineering
ENSA Marrakech
2024 – Present

MP CPGE (Preparatory Classes)
Lycée Lissane Eddine Ibn Al-Khatib, Laâyoune
2022 – 2024

Profile

Final-year Software Engineering student with hands-on experience in Java, Spring Boot, and microservices architectures. Experienced in building full-stack applications with modern frontend frameworks and RESTful APIs. Currently seeking a PFE internship where I can apply my backend and full-stack development skills, contribute to real-world projects, and further strengthen my software engineering expertise.

Professional Experience

Backend Developer Intern **July 2026 – August 2026**
Synertic • Banking & Financial Sector • Spring Boot • Kafka • Camel

- Contributed to the backend development of an event management platform using a microservices architecture (Spring Boot).
- Developed skills in distributed messaging and orchestration technologies (Apache Kafka, Apache Camel).

Initiation Internship **July 2025**
IT Fleet Management Platform • Laravel • Tailwind CSS

- Designed and developed a platform for orchestrating the company's IT equipment fleet.

Projects

OkaneTransfer – Money Transfer Platform **March 2025 – June 2026**
Spring MVC • Spring Security • PostgreSQL • Angular • Docker

- Student project, team of 6 – Role: Client Tracking, Agent Cash Register & Supervision.
- Built real-time client transfer tracking (statuses, filters, public tracking by reference number).
- Implemented the agent virtual cash register (real-time balance, daily closing, discrepancy handling) and manager dashboard with report exports.

Hotel Management Platform **February 2025**
Spring Boot • React • Microservices • Docker • JWT

- Microservices architecture with API Gateway, Eureka Service Discovery, and inter-service communication via Feign Client.
- React/Redux/Material UI frontend secured with JWT authentication, Docker Compose deployment.
- Unit and integration testing with JUnit & MockMvc.

Desktop Application – Car Rental Management **March 2024 – June 2024**
Java • JavaFX • MySQL • JDBC

- Desktop application for managing a rental agency (clients, contracts, vehicles, payments).
- MySQL persistence via JDBC with transaction management and integrity constraints.

Extracurricular Activities

Head of Web & Mobile Development **2025 – 2026**
EMJE – Junior Enterprise, ENSA Marrakech

- Led the web & mobile development team of the junior enterprise.
